

Chapter Twenty-Five (bb): Reclassifying emails using the 'X-Spam-Reclassify' Internet Header

Summary of Chapter:

How any user can reclassify their emails if the reclassify footer is not shown.

What you need:

- An email that you wish to reclassify in your inbox.
- A UTM Total Protection or Email Protection licence. You can purchase these PoP codes from the following address: <http://www.equinet.com/ordering/default.asp>

Software Revision Required:

Applicable to software revision 4.1.4 > NetPilots

Internet Headers:

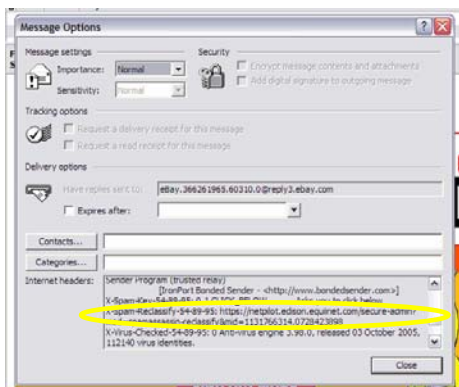

Open up your Inbox, and select the email you wish to reclassify as shown below:

Right click on the selected email, and you will see the drop down menu on the left.

Select 'Options' as highlighted left.

A new window will appear as shown below:

At the bottom of the 'Message Options' window, you will see 'Internet headers'. Scroll down till you see the following header: 'X-Spam-Reclassify-54-89-95:'

(The number used will change, according to which NetPilot you are teaching.)

After this header you will see a similar URL as below:

E.g. <https://netpilot.edison.equinet.com/secure-admin?mod=spamassassin-reclassify&mid=1131766314.0728423898>

Highlight and copy this URL.

Open a Web Browser and paste the URL and press enter.

You will see a similar screen as shown below:

As you can see this email has been classed as 'Ham'. To reclassify it as Spam, select the 'Spam' option from the drop down list as highlighted left.

Once you have selected 'Ham' or 'Spam', select the 'OK' button.

You will now see a confirmation screen; your email has been reclassified successfully.
