

Chapter Five (bc): Enable external access to SMTP mail posting server

Summary of Chapter:

- How to enable external access to SMTP mail posting server.

What you need:

- Knowledge of Admin user account and valid password for your NetPilot.

Software Revision Required:

- Applicable to software revision 5.2.0 > NetPilots

5bc:

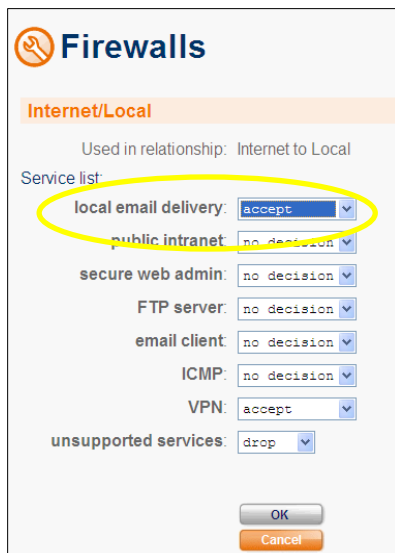

- Log on to the NetPilot as shown in Chapter One (b).

- From the left-hand side of the screen, select 'Firewall' and then 'Firewall Overview'. (All links are highlighted below).

- Select the 'Internet/Local' link from the firewall table as highlighted above.

- You will be presented with the screen below.

- Select 'accept' from the 'local email delivery' drop down list as highlighted left. (This option will accept anyone from the world. If your mail is forwarded on to you from your ISP, please see 5bd).

- Select 'OK' and 'OK' again to confirm.
