BETT 2009: BackupPilot wins Capita SIMS accreditation and goes Central Site

Equiinet's stand at BETT 2009 (E85) shows the company's continuing commitment to eLearning, eSafety and data security, with significant new product introductions and notably the latest BackupPilot Plus which has just won prestigious accreditation from Capita Children's Services.

BackupPilot Plus, launched at last year's BETT show and now in operation in many schools throughout the country, is an easy to install device that ensures all school data is backed up without any need for human intervention – and the latest model will be on show. Most significant developments of the past year have been the introduction of Equiinet's 'Central Backup Solution' and accreditation by Capita Children's Services for backing up the widely deployed SIMS (School Information Management System) software.

"BackupPilot now has a scaleable remote central site complement to the backup appliance which has been so successfully deployed in-school." says Keith Baker, Equiinet's Managing Director. "Being the only Capita accredited hardware/software appliance for backup of SIMS, we believe this is further evidence of the great progress we are making in this important arena".

About Equiinet

Equiinet was founded in 1998 and led the way in the manufacture and supply of devices giving schools the peace of mind to make full use of the internet. Using the company's ability to deliver cost-effective, integrated hardware and software solutions, Equiinet has developed a range of products with the twin themes of accelerating internet access to enable effective distribution and use of eLearning materials – complemented by enabling eSafety of pupils and security of both school network infrastructures and data.
