

October 2012

Convergence Summit South

We have something to shout about!

This year, Equinet will be showcasing its new product, TinaPilot, at the Convergence Summit South at Sandown Park on the 3rd & 4th October - a fully converged Voice & Data "Office-in-a-Box" solution.

The Convergence Summit South (CSS) is the largest Comms/ICT Channel event of the year and for over a decade has been bringing resellers together with Channel suppliers in a friendly yet business like environment. The exhibition and conference format offers resellers the opportunity to meet with suppliers, review new products and to share ideas about the fast changing marketplace in which they operate.

Equinet pioneers technologies and focuses on fully converged Voice and Data products. 'Inspiring innovation' is the Equinet mantra and it keeps us at the forefront of technological development giving clients the peace of mind that our devices are not only secure but easy to install.

We actively collaborate with our resellers to develop flexible technologies that offer tailored solutions for their clients.

Visit us at stand 44 to see how you can gain recurring revenue and your clients can receive all the latest communication technologies whilst saving money!
